DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 13, 2006 has been entered.

Claims 1-19 are pending, and claims 4-6 and 15-17 remain withdrawn from further consideration.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7-14 and 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito (Figures 5A, 6 and 9). Regarding claims 2-3 and 14, Figures 6 and 9 of Ito discloses notches 18g and 19g, respectively, which is read as defining a “serrate edge.” Regarding claims 7-8 and 18-19, Ito (column 5, lines 23-30) discloses an aluminum substrate 12 and thermally conductive sheet 13.

Response to Arguments

The rejection under 35 U.S.C. 112, second paragraph is withdrawn in view of the amendment.

Ito (Figures 2-3) discloses the conductive sheet has a flat surface in contact with the substrate 12. As noted above, the notches 18g and 19g of Ito are vacant regions are read as defining a “serrate edge.” By definition, a serrate is a notched edge. The definition and claim does not specific the notching is continuous or a series. The Examiner does not believe amending the claim to recite this feature would impart patentability. Lastly, brazing is high temperature soldering.

Conclusion

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR

Art Unit: 3753

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
